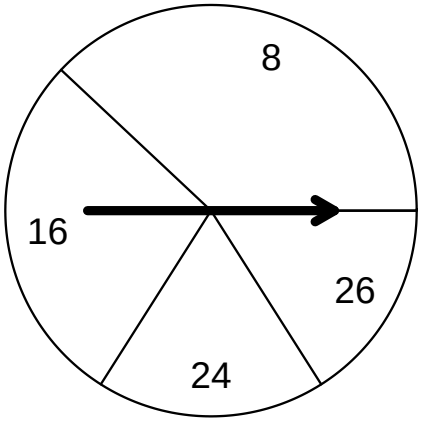
1. **Problem**
   The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	8	0.38
2	16	0.28
3	24	0.18
4	26	0.16

(a) What is the probability of spinning 24? In other words, what is $P(X = 24)$?

(b) What is the probability of spinning 24 or 26? In other words, what is $P(X = 24 \text{ or } X = 26)$?

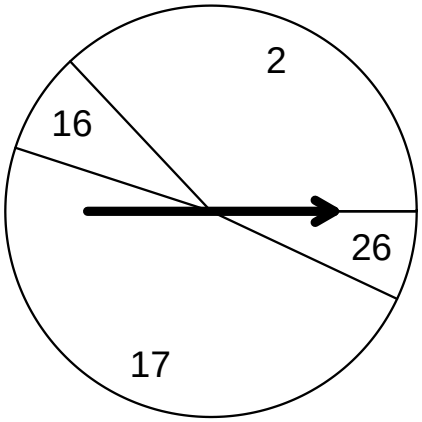
(c) If spinning twice, what is the probability of first spinning 24 and then spinning 26? In other words, what is $P(X_1 = 24 \text{ and } X_2 = 26)$?

(d) What is the probability of spinning at most 16? In other words, what is $P(X \leq 16)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

2. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	2	0.37
2	16	0.08
3	17	0.48
4	26	0.07

(a) What is the probability of spinning 17? In other words, what is $P(X = 17)$?

(b) What is the probability of spinning 2 or 26? In other words, what is $P(X = 2 \text{ or } X = 26)$?

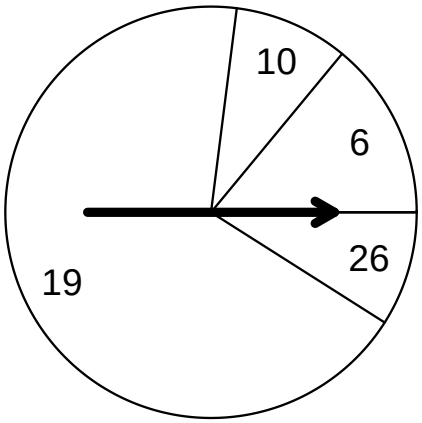
(c) If spinning twice, what is the probability of first spinning 2 and then spinning 26? In other words, what is $P(X_1 = 2 \text{ and } X_2 = 26)$?

(d) What is the probability of spinning at least 16? In other words, what is $P(X \geq 16)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

3. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	6	0.14
2	10	0.09
3	19	0.68
4	26	0.09

(a) What is the probability of spinning 6? In other words, what is $P(X = 6)$?

(b) What is the probability of spinning 10 or 26? In other words, what is $P(X = 10 \text{ or } X = 26)$?

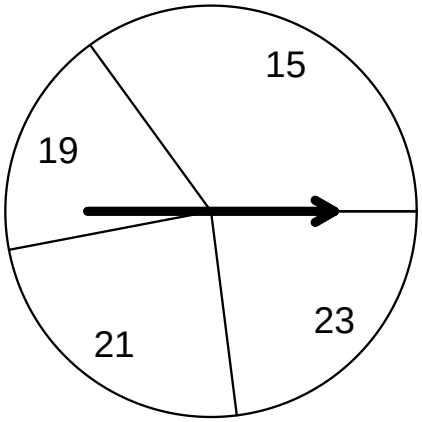
(c) If spinning twice, what is the probability of first spinning 10 and then spinning 26? In other words, what is $P(X_1 = 10 \text{ and } X_2 = 26)$?

(d) What is the probability of spinning at most 10? In other words, what is $P(X \leq 10)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

4. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	15	0.35
2	19	0.18
3	21	0.24
4	23	0.23

(a) What is the probability of spinning 21? In other words, what is $P(X = 21)$?

(b) What is the probability of spinning 19 or 23? In other words, what is $P(X = 19 \text{ or } X = 23)$?

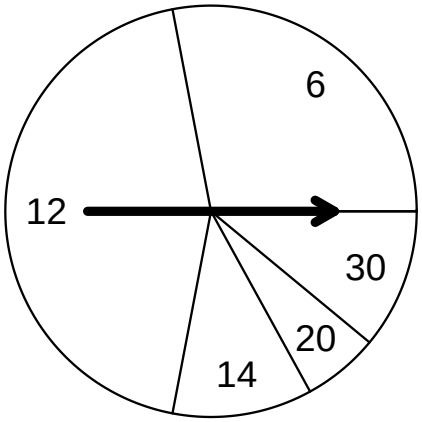
(c) If spinning twice, what is the probability of first spinning 19 and then spinning 23? In other words, what is $P(X_1 = 19 \text{ and } X_2 = 23)$?

(d) What is the probability of spinning at least 19? In other words, what is $P(X \geq 19)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

5. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	6	0.28
2	12	0.44
3	14	0.11
4	20	0.06
5	30	0.11

(a) What is the probability of spinning 20? In other words, what is $P(X = 20)$?

(b) What is the probability of spinning 6 or 12? In other words, what is $P(X = 6 \text{ or } X = 12)$?

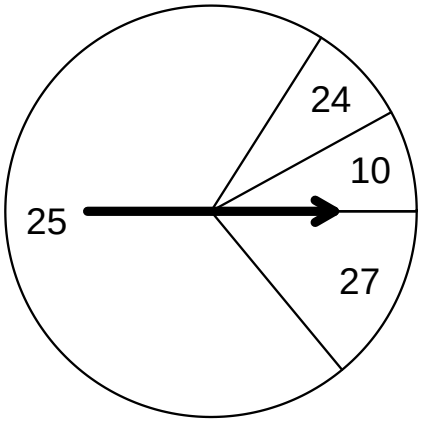
(c) If spinning twice, what is the probability of first spinning 6 and then spinning 12? In other words, what is $P(X_1 = 6 \text{ and } X_2 = 12)$?

(d) What is the probability of spinning at most 12? In other words, what is $P(X \leq 12)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

6. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	10	0.08
2	24	0.08
3	25	0.7
4	27	0.14

(a) What is the probability of spinning 24? In other words, what is $P(X = 24)$?

(b) What is the probability of spinning 10 or 27? In other words, what is $P(X = 10 \text{ or } X = 27)$?

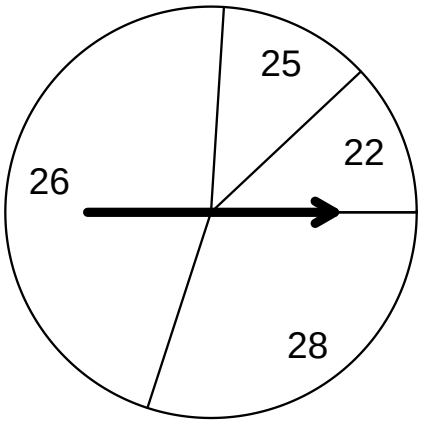
(c) If spinning twice, what is the probability of first spinning 10 and then spinning 27? In other words, what is $P(X_1 = 10 \text{ and } X_2 = 27)$?

(d) What is the probability of spinning at least 24? In other words, what is $P(X \geq 24)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

7. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	22	0.12
2	25	0.12
3	26	0.46
4	28	0.3

(a) What is the probability of spinning 22? In other words, what is $P(X = 22)$?

(b) What is the probability of spinning 26 or 28? In other words, what is $P(X = 26 \text{ or } X = 28)$?

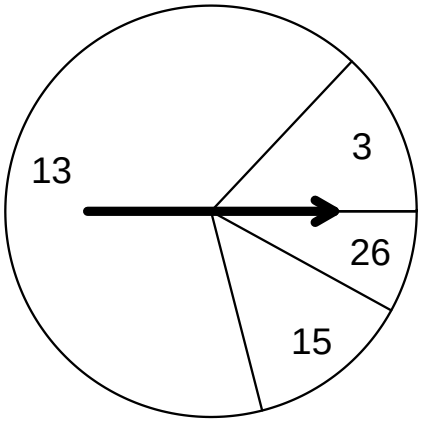
(c) If spinning twice, what is the probability of first spinning 26 and then spinning 28? In other words, what is $P(X_1 = 26 \text{ and } X_2 = 28)$?

(d) What is the probability of spinning at least 25? In other words, what is $P(X \geq 25)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

8. **Problem**
The spinner below will be used to generate a sample.



The spinner's probability distribution is shown below.

i	x_i	p_i
1	3	0.13
2	13	0.66
3	15	0.13
4	26	0.08

(a) What is the probability of spinning 26? In other words, what is $P(X = 26)$?

(b) What is the probability of spinning 3 or 13? In other words, what is $P(X = 3 \text{ or } X = 13)$?

(c) If spinning twice, what is the probability of first spinning 3 and then spinning 13? In other words, what is $P(X_1 = 3 \text{ and } X_2 = 13)$?

(d) What is the probability of spinning at most 15? In other words, what is $P(X \leq 15)$?

(e) Determine the mean of the probability distribution by using $\mu = \sum p_i x_i$.

(f) Determine the standard deviation of the probability distribution by using $\sigma = \sqrt{\sum p_i (x_i - \mu)^2}$.

1. Make a table (for parts d and e).

x_i	p_i	$p_i x_i$	$x_i - \mu$	$(x_i - \mu)^2$	$p_i(x_i - \mu)^2$
8	0.38	3.04	-8	64	24.32
16	0.28	4.48	0	0	0
24	0.18	4.32	8	64	11.52
26	0.16	4.16	10	100	16
=========	=========	=========	=========	=========	=========
		$\sum p_i x_i = 16$			$\sum p_i(x_i - \mu)^2 = 51.84$
		$\mu = 16$			$\sigma = \sqrt{\sum p_i(x_i - \mu)^2} = 7.2$

(a) 0.18

(b) 0.34

(c) 0.0288

(d) 0.66

(e) $\mu = 16$

(f) $\sigma = 7.2$

2. Make a table (for parts d and e).

x_i	p_i	$p_i x_i$	$x_i - \mu$	$(x_i - \mu)^2$	$p_i(x_i - \mu)^2$
2	0.37	0.74	-10	100	37
