

**1. Problem**

A continuous random variable was measured 100 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 35?
- (d) What percent of the measurements are greater than 50?
- (e) Of the measurements greater than 35, what percent are greater than 50?
- (f) Estimate the value of the 30th percentile.

**2. Problem**

A continuous random variable was measured 100 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are less than 31?
- (d) What percent of the measurements are less than 30?
- (e) Of the measurements less than 31, what percent are less than 30?
- (f) Estimate the value of the 41th percentile.
