

1. Problem

A continuous random variable was measured 500 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are less than 60?
- (d) What percent of the measurements are less than 50?
- (e) Of the measurements less than 60, what percent are less than 50?
- (f) Estimate the value of the 45th percentile.

Solution

- (a) skew left
- (b) 40
- (c) 2.4%
- (d) 0.6%
- (e) 25%
- (f) 80

2. Problem

A continuous random variable was measured 250 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 62?
- (d) What percent of the measurements are less than 68?
- (e) Of the measurements greater than 62, what percent are less than 68?
- (f) Estimate the value of the 38th percentile.

Solution

- (a) bimodal
- (b) 20
- (c) 42.8%
- (d) 79.2%
- (e) 51.4%
- (f) 56
