

1. Problem

A continuous random variable was measured 300 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 42.6?
- (d) What percent of the measurements are less than 42.8?
- (e) Of the measurements greater than 42.6, what percent are less than 42.8?
- (f) Estimate the value of the 24.67th percentile.

2. Problem

A continuous random variable was measured 300 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 74?
- (d) What percent of the measurements are greater than 80?
- (e) Of the measurements greater than 74, what percent are greater than 80?
- (f) Estimate the value of the 65th percentile.
