

1. Problem

A continuous random variable was measured 500 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 46?
- (d) What percent of the measurements are less than 50?
- (e) Of the measurements greater than 46, what percent are less than 50?
- (f) Estimate the value of the 93.8th percentile.

2. Problem

A continuous random variable was measured 300 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 70?
- (d) What percent of the measurements are less than 78?
- (e) Of the measurements greater than 70, what percent are less than 78?
- (f) Estimate the value of the 5.667th percentile.
