

1. Problem

From a very large population, a small sample of measurements was taken.

120	130	92	95	130
-----	-----	----	----	-----

Please calculate the average absolute deviation using the following formula:

$$AAD = \frac{\sum |x - \bar{x}|}{n}$$

2. Problem

From a very large population, a small sample of measurements was taken.

169	175	169	169
-----	-----	-----	-----

Please calculate the (Bessel corrected) sample standard deviation using the following formula:

$$s = \sqrt{\frac{\sum (x - \bar{x})^2}{n - 1}}$$
