

1. Problem

A continuous random variable was measured 400 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 61.2?
- (d) What percent of the measurements are greater than 62.4?
- (e) Of the measurements greater than 61.2, what percent are greater than 62.4?
- (f) Estimate the value of the 29.25th percentile.

2. Problem

A continuous random variable was measured 400 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are less than 21?
- (d) What percent of the measurements are greater than 20?
- (e) Of the measurements less than 21, what percent are greater than 20?
- (f) Estimate the value of the 58.5th percentile.
