

1. Problem

From a very large population, a small sample of measurements was taken.

| | | | | |
|----|----|----|----|----|
| 93 | 95 | 92 | 95 | 96 |
|----|----|----|----|----|

Please calculate the average absolute deviation using the following formula:

$$AAD = \frac{\sum |x - \bar{x}|}{n}$$

2. Problem

From a very large population, a small sample of measurements was taken.

| | | | |
|-----|-----|-----|-----|
| 113 | 113 | 113 | 127 |
|-----|-----|-----|-----|

Please calculate the (Bessel corrected) sample standard deviation using the following formula:

$$s = \sqrt{\frac{\sum (x - \bar{x})^2}{n - 1}}$$
