

1. Problem

From a very large population, a small sample of measurements was taken.

102	89	89	109	93	94	82
-----	----	----	-----	----	----	----

Please calculate the average absolute deviation using the following formula:

$$AAD = \frac{\sum |x - \bar{x}|}{n}$$

2. Problem

From a very large population, a small sample of measurements was taken.

95	109	103	95	98
----	-----	-----	----	----

Please calculate the (Bessel corrected) sample standard deviation using the following formula:

$$s = \sqrt{\frac{\sum (x - \bar{x})^2}{n - 1}}$$
