

1. Problem

A continuous random variable was measured 300 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are less than 13.5?
- (d) What percent of the measurements are less than 12.5?
- (e) Of the measurements less than 13.5, what percent are less than 12.5?
- (f) Estimate the value of the 53.67th percentile.

2. Problem

A continuous random variable was measured 200 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are less than 43.5?
- (d) What percent of the measurements are less than 41?
- (e) Of the measurements less than 43.5, what percent are less than 41?
- (f) Estimate the value of the 59th percentile.
