

1. Problem

A continuous random variable was measured 100 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 65?
- (d) What percent of the measurements are greater than 66?
- (e) Of the measurements greater than 65, what percent are greater than 66?
- (f) Estimate the value of the 9th percentile.

2. Problem

A continuous random variable was measured 100 times. The histogram is shown below.

- (a) Describe the overall shape of the distribution. (symmetric mound, skew left, skew right, uniform, or bimodal)
- (b) Estimate the range of the distribution (range = max-min).
- (c) What percent of the measurements are greater than 22.5?
- (d) What percent of the measurements are less than 23.5?
- (e) Of the measurements greater than 22.5, what percent are less than 23.5?
- (f) Estimate the value of the 50th percentile.
